

# MyDQS 2.0

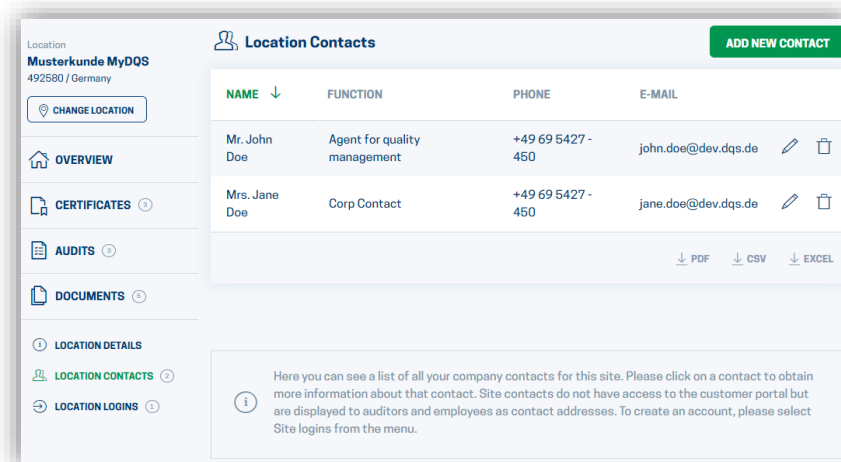

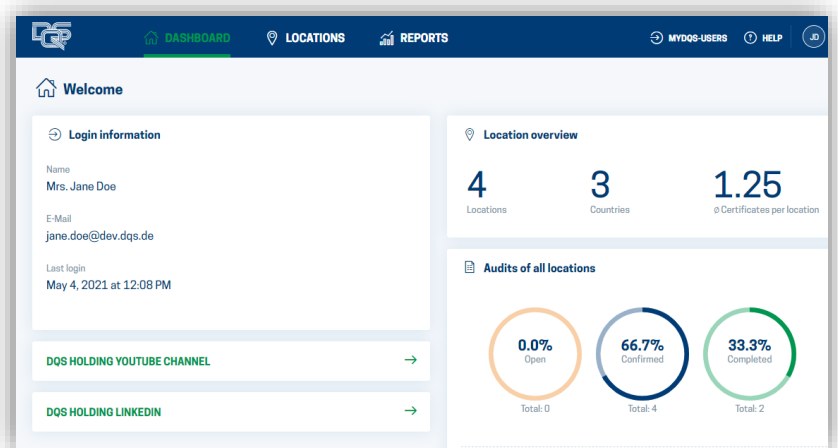

## MORE TRANSPARENCY FOR YOUR AUDIT PROJECTS

Our new Customer Portal MyDQS offers you full insight into your company’s audit and certificate status.

The new interface is clearly arranged, intuitive, and enables convenient handling from your computer as well as from your smartphone.

The informative dashboard provides you with an instant overview of the status of your audits at a glance.

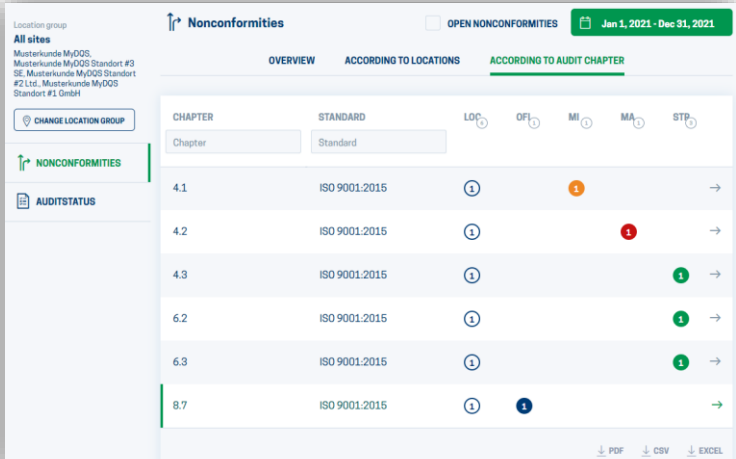

The newly designed user administration allows you to assign additional users individually for all your sites.

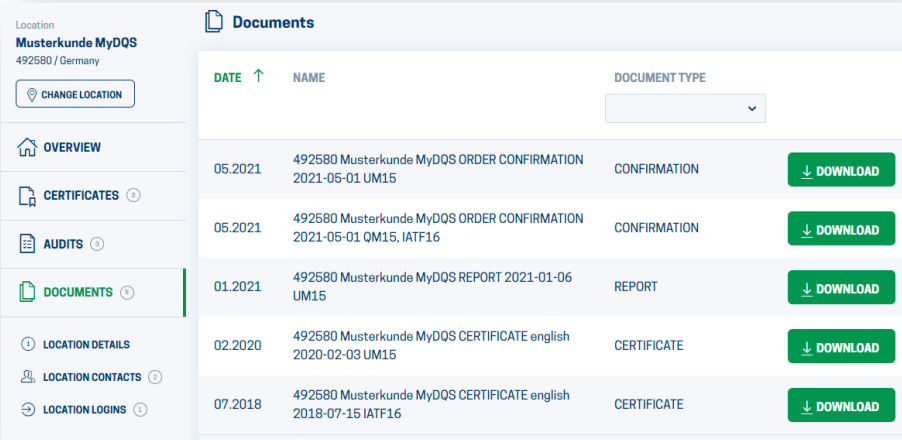

Authorizations can be given even for complex corporate structures at multiple locations in several countries.

In conjunction with our Audit Manager®, non-conformities and opportunities from audits that were conducted using this advanced audit tool are visible and can be monitored and analyzed.

It also allows benchmarking with other sites in your organization.
